

MIKE LOCE'S GUITAR TECH PAGE: mikeloce@gmail.com

Keep your guitar in tip-top shape!
(A healthy guitar is essential for fun playing and practice!!)

Guitar Tech Services

Some services may be a combination of those listed below, all instruments are case-by case basis, your cost may be more if we have to order specific parts for the repair after consultation with the owner)

BENCH FEE: \$40/hr

Bench fee is a standard charge for looking at the instrument and diagnosing what is wrong with it. We try to keep our cost low compared to music stores, but the fee is necessary to cover technician's time.

- 🎸 **Truss rod adjustment: \$7**

 - **\$30** first one
 - **\$15** each additional
 - Parts not included

**On basic jobs, two to four day turnaround is typical.
If parts have to be special ordered, return time increases.**

Guitars, basses and amps are taken in on a case by case basis. If your instrument is really messed up, I'll do my best to tell you honestly what it needs and how much it may cost. Sometimes this requires me to take it home and look at it. Occasionally an instrument will be so damaged that repair is not even practical. Examples include: broken headstocks (the top where tuners are), necks, acoustics with soundboard or bridge damage, or missing or broken custom electronic parts. If I cannot get a required part or the repair exceeds what I can do with my tools and repair bench setup, I'll let you know frankly as well. If waiting on a price quote, a primary email to contact you would be very useful.
